Education

University of Texas San Antonio

May 2028

Bachelor of Science in Computer Science, Minor in Mathematics, Specialization in Data Science

GPA: 4.0/4.0

- Organizations: Honors College, Cyber Jedi's, ACM, ICPC

Experience

MITRE

June 2026 – Present

Systems Engineer Intern

San Antonio, Texas

- Incoming Summer 2026
-

University of Texas San Antonio

October 2025 – Present

AI/ML Research Assistant

San Antonio, Texas

- Led analysis of **10TB+** Reddit data mapping emerging technologies to the Gartner Hype Cycle by building **NLP** pipelines processing **1.7B+** text samples; co-authoring publication
- Reduced source identification from manual review to near-instant retrieval by automating large-scale text analysis with **topic modeling and semantic search**

Better Futures Institute

January 2026 – May 2026

Software Engineer Intern

San Antonio, Texas

- Reduced manual infrastructure processing time by **34%** by engineering predictive models for pothole detection and community needs analysis in **Python**
- Developed AI solutions for public infrastructure on a **15-person team**, expanding services for San Antonio residents
- Directed **AI implementation**, presented architecture to **100+ stakeholders**, and resolved critical deployment bugs

MD Anderson Cancer Center

December 2025 – May 2026

AI/ML Research Intern

Houston, Texas

- Raised **dysphagia classification** accuracy from **63% to 97%** by building **ML imaging** pipelines that grade swallowing dysfunction severity from modified barium swallow studies on **100GB+** head and neck cancer data; deployed clinically
- Saved **~20 hours** per week for **500 clinical researchers** by automating feature extraction and supervised learning in **Python**, replacing repetitive manual image analysis
- add

Pumps of Houston

May 2025 – August 2025 & May 2026 – Present

IT Support Intern — Software Engineer Intern

Houston, Texas

- Administered **60+** user accounts, roles, and permissions within **Active Directory**, ensuring **0 security casualties**
- Provided Tier 1-Tier 2 technical support and resolved **35+ tickets/week** using **Acumatica ERP System**
- Improved IT reliability by diagnosing failures and **securing permissions** across **hardware and network** systems

Leadership

RowdyHacks

December 2025 – Present

Co-Director

San Antonio, Texas

- Funded and managed over **\$45,000**, by **10+** companies with **5 teams**
- Hosted software development hackathon for over **900+** people

Dell Technologies

February 2026 – April 2026

2nd Place (\$1500)

Remote

- Selected as **1 of 51** students from **325+** applicants, focused on AI, mentorship, and applied learning
- Engineered data solutions with **4,000+** lines of **preprocessing** and **cleaning** across 150 products

Projects

Vision | *React, Three.js, Python, FastAPI*

March 2026 – Present

- * Selected as **1 of 15 teams** in the USA for Redbull Basement Competition (0.06%)
- * Engineered **comparables analysis** and **zoning inference** pipelines across **structured land datasets** with Python
- * Rendered 3D structural visualizations with Three.js and built a financial feasibility dashboard for real estate developers

Technical Skills

Programming: Python, Java, Lua, SQL **Networking:** Docker, Kubernetes, Git, VMWare, Switches

AI/ML & Data Science: AI/ML (NLP, RAG, LLMS, PyTorch, Scikit-learn, data preprocessing)
